

Manthan Legal – Document Review Case Study - 1

DOCUMENT REVIEW – REDUCING E-DISCOVERY REVIEW COSTS

ISSUE AT THE LAW FIRM

- The client, a niche document review firm with special focus in pharmaceutical litigation, sought to get document review done for relevance by a medical team.

MANTHAN SOLUTION

- Built a dedicated team of 10 medico-legal staff, 2 doctors and 1 lawyer to do document review for relevance for large pharmaceutical industry cases. The team reviewed a total of 0.8 million documents within 14 weeks.
- The team delivered the entire review project 8 weeks before targeted date.

BENEFITS

- The delivery team spanned across two shifts thus reducing turnaround time for the entire project. This enabled the client to bid for 3 additional projects, each review of about 0.5 million pages.
- On this project, the client expended a total offshore cost of USD 96,000, thus setting a good benchmark of 0.12 cents per document for relevance review in a niche domain, a new achievement for the client.

Manthan had the team ready and working at a short notice of 7 days
